

# Adjusting row / column width and height

## Microsoft Excel 2007

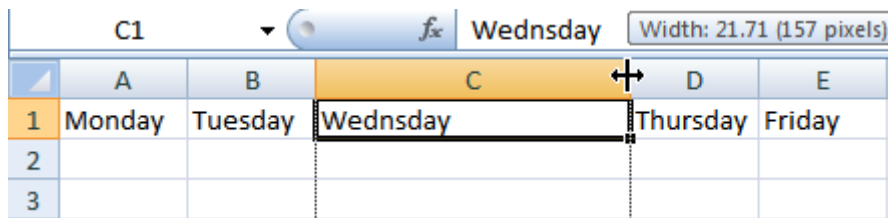

### Resizing a single column width

1. Place your cursor over the dividing line, i.e., between column headers

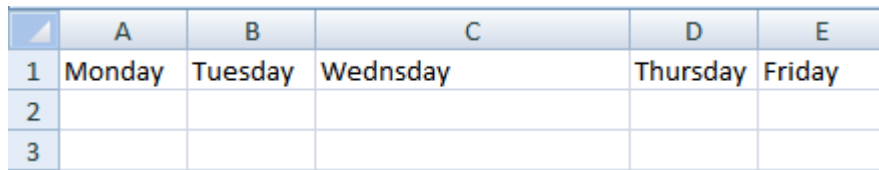

Tip  
Your mouse cursor should change to  (Resize column cursor).

2. Click and drag the dividing line.

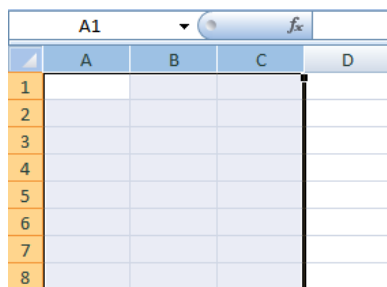

3. Release your mouse

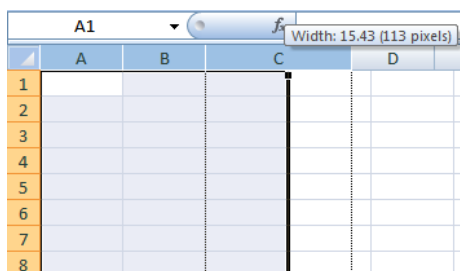

Tip  
When you **double click** in the same spot (the right edge of the column), it will resize to fit the **longest** text in any cell in the column.

### Resizing multiple columns simultaneously

1. Select columns that you wish to alter (click on the column header)

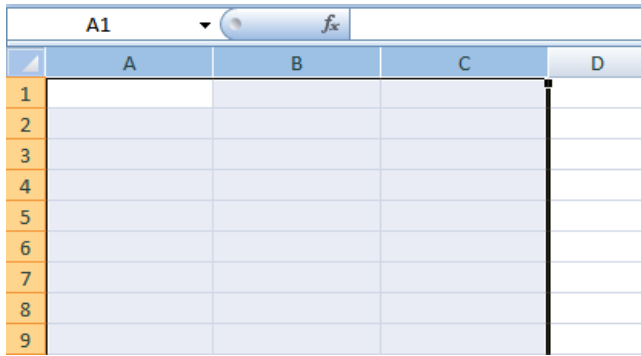

2. Click and drag one of the selected columns' header

- 3. Release your mouse when you reach the desired column width.

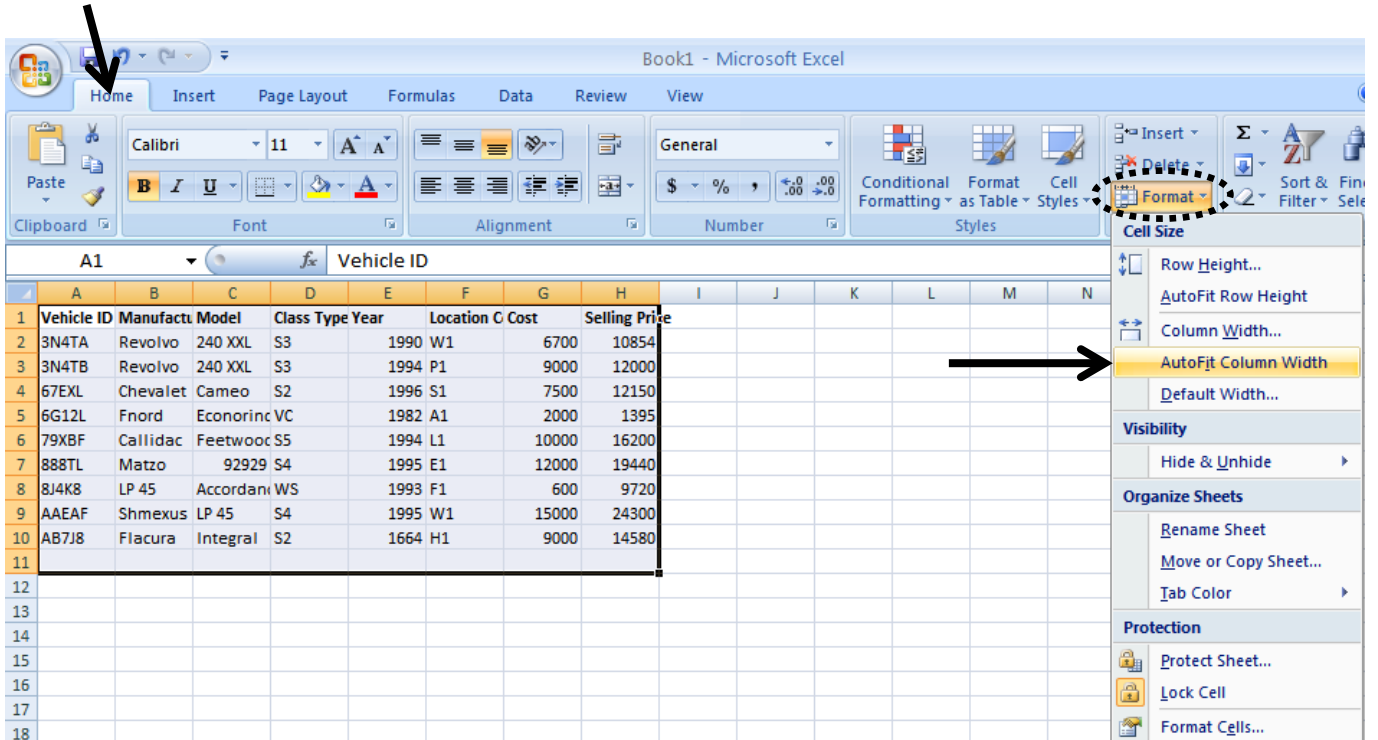

**Resizing multiple columns to fit individual cell contents - *AutoFit Selection***

- 1. Select columns that you wish to fit the column size according to the cell contents
